

## PROFILE

Experienced Software Developer with 3.10 years of expertise in React.js, specializing in state management (Redux), JavaScript (ES6+), and crafting intuitive, user-friendly interfaces. Proficient in delivering optimized, high-performance web solutions, leveraging modern front-end frameworks and libraries to meet critical business requirements. Strong skills in HTML5, CSS3, and TypeScript, with a focus on responsive design and cross-browser compatibility. Proven ability to collaborate effectively in Agile environments and deliver scalable, maintainable code using industry best practices.

## CONTACT

**PHONE:** +91 7758920980 , 9921776204

**EMAIL:** amarsalunkhe317@gmail.com

## TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), HTML5, CSS3, TypeScript.
- **Frameworks & Libraries:** Redux, React Route, Tailwind CSS, React Hook Form, Axios, Bootstrap.
- **State Management:** Redux, Context API.
- **Testing:** Jest, React Testing Library.
- **Version Control:** Git.
- **Build Tools:** NPM, Babel.
- **Development Tools:** Eclipse, Spring Tool Suite (STS), VS Code, Node.js, Postman.
- **Collaboration Tools:** Jira, Jenkins.
- **Database :** Mysql, MongoDB.

## Certifications

- **React-js Certificate**

# AMAR SALUNKHE

## SOFTWARE DEVELOPER

## WORK EXPERIENCE

**Maveric Systems : March 2023 – Present**

**Project Name: Spectrum**

**Project Details:**

Spectrum is a central portal designed for internal employees to connect with mentors. It allows mentees to search for mentors based on their technical skills, facilitating a structured mentorship system.

### Roles and Responsibilities:

- Collaborated with cross-functional teams of developers, designers, and product managers to deliver responsive, user-friendly web applications that aligned with business objectives and improved user experience.
- Designed and developed dynamic, reusable React components and implemented RESTful API integrations to ensure seamless data communication between front-end and back-end systems.
- Leveraged modern JavaScript features like arrow functions, promises, async/await, and destructuring to enhance application performance and code maintainability.
- Led the implementation of new UI features, resolved user-reported issues, and optimized existing components for better performance and scalability.
- Reduced UI bugs by 25% through rigorous debugging using tools like Chrome DevTools, React Developer Tools, and enhanced testing with Jest and React Testing Library.
- Ensured cross-browser compatibility and responsiveness by adhering to best practices in HTML5, CSS3, and Bootstrap.
- Actively participated in Agile ceremonies like sprint planning and retrospectives to align deliverables with project timelines and business goals.

**Tech Mahindra : March 2021 – January 2023**

**Project Name: Edge**

**Project Details:**

Edge provides installation and repair services for AT&T products. The CAWO (Create Amend Work Order) module helps in managing appointment details for services, including reserving, confirming, and canceling orders.

### Roles and Responsibilities:

- Gathered and analyzed client requirements, shaping the development direction of the project.
- Estimated user stories, created detailed technical documentation, and designed RESTful APIs to meet project goals.
- Analyzed and resolved bugs to ensure application stability and performance.
- Conducted unit testing and participated in code reviews to ensure high-quality standards.
- Collaborated with the team within an Agile environment to promote continuous improvement.

## EDUCATION

**RMD Sinhgad School Of Engineering, Pune**

Jun 2017 – July 2020

I have completed Computer Engineering with 1st Class
